

CWSF 2018 - Ottawa, Ontario

Brian Kong

Water: An Investigation of Purification

Challenge: Environment

Category: Junior

Region: Renfrew County

City: Pembroke, ON

School: Highview P.S.

Abstract: Freshwater is extremely scarce in this world, with only 1.5% of the world's water being accessible. With global warming, this number only gets smaller. Sunlight, bleach, iodine and boiling water can all treat water well.

Biography

My name is Brian Kong and I am currently in Grade 8 at Highview Public School. My favorite subjects at school are Math and Science. My hobbies outside of school are playing piano and playing badminton. I have been playing the piano ever since the age of 4, and playing badminton since the age of 8. I also accompany church services, and play competitive badminton outside of school. I am the President of our school's Student Council. I am also involved with many other school sports and activities like the volleyball, soccer, cross-country, trivia and badminton teams. In the future, I hope to study something in the science field. I am looking forward to attend CWSF Ottawa this year.
